PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IPIC (DIA). The photographic analysis for this particular report was performed by the Production Center IPIC.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (I) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1D

25X1D

25X1A

25X1A

Pabrade Army Barracks, located on the western outskirts of Pabrade, may provide administrative and logistical support for Pabrade Army Training Area Northeast [REDACTED] which is located approximately 4 kilometers (km) northeast.

The barracks area (Figure 1) covers approximately 100 acres and includes 4 barracks, 6 administration buildings, 19 storage buildings, 1 probable vehicle maintenance storage building, and 9 support buildings (Figures 2 and 3).

[REDACTED] missions of interpretable quality,

25X1D

covering the period [REDACTED] were used in preparation of this report. Comparison reveals a relatively constant level of activity during the summer and very limited activity during the winter. No significant changes have been observed during the period covered by the photography.

The small number of barracks and the large number of storage buildings indicate that the primary function of this installation may be storage and/or support of the training area.

DESCRIPTION OF INSTALLATION

Railroad Service

The double track Vilnius-Svencioneliai railroad serves the storage area of this installation.

Road Service

The main road which serves Pabrade also serves this installation.

Aircraft Landing Strip

Pabrade Airfield, a graded-earth airfield, is located 10 km northeast of the barracks.

Administrative and Troop Housing Area

Area D contains 4 barracks, 6 administration buildings, 8 storage buildings, one 220-by

40-foot probable vehicle maintenance storage building, and 8 small support buildings.

General Storage Area

Area E is secured and contains 11 small storage buildings on the south side of a stream which runs through the area. A bridge across the stream connects this storage area with the barracks area.

Flat-Trajectory Firing Range

Area P contains a 2,200-foot flat-trajectory firing range with a stationary target. The direction of fire on this range is probably northwest into the wooded area. One building provides support for this range.
